What is Configuration Portal?

OPRESCAS for Directors, Mentors, and Administrators · https://ncope.org/index.php/docs/what-is-configuration-portal/

Configuration Portal is integrated into WebAdMIT Prelaunch and serves as the space where residency program directors, mentors, and staff enter information about the program and identify the specific opportunities available. A company hosting a residency has the ability to offer multiple opportunities (for example a clinical track prosthetic residency AND a research track orthotic residency) at multiple locations (if the organization has offices across multiple geographic regions).
